NEWS LETTER FOR NATURE LOVERS

Since the beginning, trees have furnished us with two of life's essentials, food and oxygen. As we evolved, they provided additional necessities such as shelter, medicine, and tools. Today, their value continues to increase and more benefits of trees are being discovered as their role expands to satisfy the needs created by our modern lifestyles.

Trees are an important part of every community. Our streets, parks, playgrounds and backyards are lined with trees that create a peaceful, aesthetically pleasing environment. Trees increase our quality of life by bringing natural elements and wildlife habitats into urban settings. We gather under the cool shade they provide during outdoor activities with family and friends. Many neighborhoods are also the home of very old trees that serve as historic landmarks and a great source of town pride.

Trees contribute to their environment by providing oxygen, improving air quality, climate amelioration, conserving water, preserving soil, and supporting wildlife.

During the process of photosynthesis, trees take in carbon dioxide and produce the oxygen we breathe. According to the U.S. Department of Agriculture, "One acre of forest absorbs six tons of carbon dioxide and puts out four tons of oxygen.

This is enough to meet the annual needs of 18 people." Trees, shrubs and turf also filter air by removing dust and absorbing other pollutants like carbon monoxide, sulphur dioxide and nitrogen dioxide. After trees intercept unhealthy particles, rain washes them to the ground.

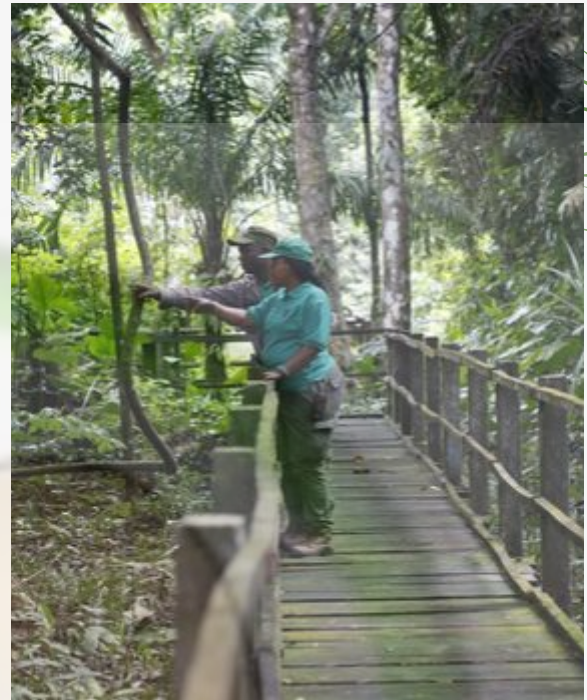

Trees control climate by moderating the effects of the sun, rain and wind. Leaves absorb and filter the sun's radiant energy, keeping things cool in summer.

Trees also preserve warmth by providing a screen from harsh wind. In addition to influencing wind speed and direction, they shield us from the downfall of rain, sleet and hail. Trees also lower the air temperature and reduce the heat intensity of the greenhouse effect by maintaining low levels of carbon dioxide. Many animals, including elephants, koalas and giraffes eat leaves for nourishment. Flowers are eaten by monkeys, and nectar is a favourite of birds, bats and many insects.

Animals also eat much of the same fruit that we enjoy this process helps disperse seeds over great distances. Of course, hundreds of living creatures call trees their home. Leaf-covered branches keep many animals, such as birds and squirrels, out of the reach of predators.

A tree is beautiful, but what's more, it has a right to life; there can be neither civilization nor happiness if forests crash down under the axe, if the climate is harsh and severe, if people are also harsh and severe. ... What a terrible future!

CHILDRENS DAY

Quarterly Newsletter curated by our top Editors

Children's day is a day dedicated to promote mutual exchange and standing among children.

Finima Nature Park made special effort to inform children of their rights to take care of the environment Keeping it clean and saving it from the problematic pollutions that disturbs it.

Children were taking for nature work to introduce them to the different plant species that are present in the Park and how they are important to us thereby stating more reason why they should be conserved.

There were games and music, lots of fun for the enjoyment of the day for the children.

WORLD ENVIRONMENT DAY

Quarterly Newsletter curated by our top Editors

Finima Nature Park joined the world to celebrate the highly coveted event that took place on the 11th day of June, 2019 with the theme “Beat Air Pollution” World Environment Day is a global event for positive environmental actions. This day has developed into a global platform for acting on urgent environmental issues, driving change in our consumption habits as well as influencing the local and national policy.

The activity was carried out by both pupils and students from different schools. It was conducted in two Phases: The “Pre WED” and the “WED”. The Pre WED was carried out earlier before the exact day with competitions both in collage art work, quiz, Debate, and Spelling bee. Winners from each competition were decided and scheduled for award on the WED day
